

## **SET UP INFO TO READ:**

---

***(Important Note: While an installed Unicode Tamil Font file enables one to READ Tamil, a Keyboard driver is ALSO required to be installed, to write / type Tamil)***

### **1) To setup web browser and email client:**

What are a web browser and an email client? The Internet Explorer and the Outlook Express are examples of these.

Setup procedure follows:

1a) to view your browser in Tamil Unicode, set your language and font schemes (in the open IE) in:

- i) tools/internet options/languages/add/Tamil(ta)
- ii) tools/internet options/fonts/scripts/Tamil/Latha (or any other, like UTAM.ttf available at this site).

**Click OK, where ever required.**

**Now, go to View and Choose Encoding.**

**Choose Unicode.**

1b) To setup Outlook Express or similar:

**In OE, go to:**

- i) tools/options/read/fonts/Unicode (set as default);  
encoding/Unicode(UTF-8)
- ii) tools/options/read/international settings/use default encoding  
for all incoming messages.

iii) tools/options/send/international settings/default  
encoding/Unicode(UTF-8)

**Click Apply and OK at appropriate locations.**

(To install a Tamil Font file: Control Panel/Font → File/Install New Font → Font File's location )
